

GEYSERVILLE SANITATION ZONE FY 2025/2026 WRITTEN BASIS OF SEWER SERVICE CHARGE

- DATE: March 2025
- TO: Sonoma Water Management

FROM: Lynne Rosselli, Financial Services Division Manager

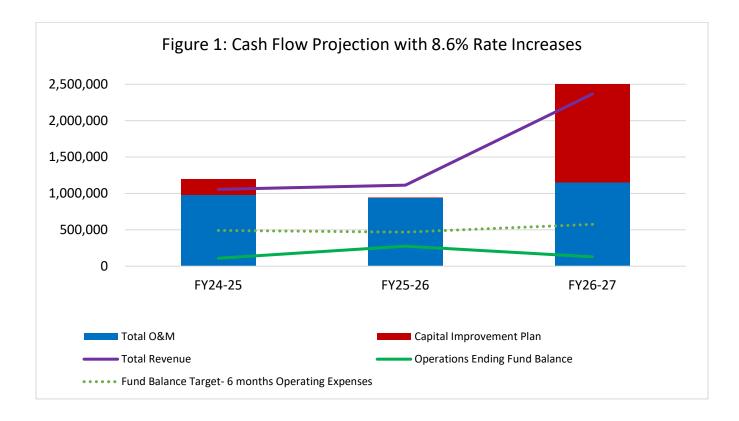

SUBJECT: GEYSERVILLE SANITATION ZONE FY 2025/2026 WRITTEN BASIS OF SEWER SERVICE CHARGE

The purpose of this Memorandum is to provide a written basis for the sewer service charges and update current and projected costs and cost-of-service based rates. Key guiding principles include developing rates that are fair and equitable to all customer classes, distributing costs equally among ratepayers, and complying with the legal requirements of Proposition 218 and other California laws. Figure 1 below demonstrates the challenge that the Zone faces in recovering the costs of providing service, and generating adequate funding for operations, maintenance, and capital infrastructure upgrades due to its small customer base.

This memorandum provides the basis for an 8.6% rate increase in FY 2025-2026. Revenue from sewer service charges comprises approximately 45% of the total revenue needed to provide service.

Costs are projected to increase over the planning period shown in Figure 1 below. The increased costs are for aging infrastructure including the Force Main Replacement Project. Estimated costs for the Force Main Replacement Project are \$1.8 million over the next three years. The 8.6% rate increase is needed to build reserves to fund the Force Main Replacement Project and apply for grant funding. Offsetting revenue from a future grant application is necessary to fund construction projects.

The Zone faces an ongoing operations deficit and has a critical need for infrastructure upgrades. Sonoma Water General Fund subsidies to the Zone over the past five years have been more than \$1.3 million, and \$1.7 million is projected for the next three years making up approximately 40 percent of the total estimated revenue for the Zone. Stewarding financially sound utilities and providing safe, high quality wastewater service that will protect the community and the environment requires that rates keep pace with rising costs. Figure 1 and Table 1 below provide documentation in support of the proposed 8.6 percent rate increases.

Fiscal Year	Estimated FY24-25	Projected FY25-26	Projected FY26-27
Proposed Rate Increase	8.8%	8.6%	8.6%
Rate	1,548	1,680	1,824
Equivalent Single Family Dwellings	370	371	372
BEGINNING FUND BALANCE	494,886	353,166	525,489
<u>REVENUE</u>			
Sanitation Charges	496,066	522,700	550,700
Interest on Pooled Cash	9,750	15,870	15,850
State/Federal Grants	0	0	1,199,100
Transfers from General Fund	550,150	575,000	600,000
Total Revenue	1,055,966	1,113,570	2,365,650
<u>EXPENDITURES</u>			
Total O&M	982 <i>,</i> 486	936,247	1,151,000
Capital Improvement Plan	215,200	5,000	1,603,800
Total Expenditures	1,197,686	941,247	2,754,800
Net Revenue	(141,720)	172,323	(389,150)
Ending Fund Balance - Proposed 8.8% Rate Increase Operations Ending Fund Balance Fund Balance Target- 6 months Operating Expenses	353,166 109,517 <i>490,743</i>	525,489 274,430 <i>467,624</i>	140,275 127,330 <i>575,000</i>

Table 1: Cash Flow Projection and Revenue Requirement

The proposed rate increase for the Equivalent Single Family Dwelling (ESD) value relies upon the Zone obtaining additional revenues from other sources of funding such as loans and grants. The total expenditures budget divided by ESDs, the total expenditures budget minus grant/loan revenue divided by ESDs, and the proposed ESD rate are shown in the table below. The proposed ESD rate is the lowest the rate can be set given the need to maintain reserves, the structural deficit of the Zone, and the risks and uncertainties associated with receiving other sources of funding.

Fiscal Year	FY24-25	FY25-26	FY26-27
Total Expenditures Divided by ESDs	3,237	2,537	7,406
Expenditures budget minus grant/loan revenue divided by ESDs	3,237	2,537	4,182
Proposed ESD Rate	1,548	1,680	1,824

Proportionality of costs for users is maintained by using the Equivalent Single Family Dwelling (ESD) methodology. A standard single-family home constitutes one ESD. Parcels with other uses (for example, apartments and commercial buildings) are assigned a number of ESDs using standard

equivalency factors that estimate the probable quantity and quality of sewage effluent normally generated by such uses in comparison to a single-family home. The assigned cost per ratepayer is the ESD cost multiplied by the number of ESDs assigned to the parcel. The ESDs are assigned in Exhibit A of the proposed rate ordinance, which is attached to this memorandum.
