TOTAL APNs	2,504	2,503	2,503	2,504	0.04%

**E. Summary of Issues and Significant Changes**

The requested rate per ESD for FY25-26 annual service charges is \$2,486, representing a 8.5% increase from FY24-25. Annual sewer service charge revenue, adjusted for the anticipated number of ESDs and an estimated delinquency factor, is projected to increase from the FY 24-25 budget. This revenue change is primarily due to the rate increase.

The Russian River County Sanitation District (Russian River CSD) treatment plant was completed in September 1980 and began operating in 1982. The Russian River CSD treatment plant was recently upgraded to increase the capacity to treat wastewater flows during flood conditions in the Russian River CSD service area.

The requested rates should provide the funds necessary to operate and maintain the Russian River CSD's collection system, treatment plant, and reclamation system. In addition to the funds needed for the ongoing operation of wastewater treatment and disposal facilities, funds are necessary for the replacement of aging infrastructure. In 2014, the main pipeline that feeds wastewater to the treatment plant ruptured. This event along with a natural hazard assessment completed for the district in 2014 identified the need to upgrade significant portions of the collection system that are located in unstable soils and that could fail during a large earthquake. Addressing this collection system vulnerability will take on the order of 20 years to complete. Rate increases over the rate of inflation will be needed for several years to generate funding for these projects.
