

# Water Transmission System Draft Budget Overview

Fiscal Year 2023-2024

#### **About Sonoma Water**

Sonoma Water, an independent special district formed in 1949, provides drinking water to Cotati, Marin Municipal Water District, North Marin Water District, Petaluma, Rohnert Park, Santa Rosa, Sonoma, Valley of the Moon Water District, and Windsor. These cities/ districts in turn deliver drinking water to more than 600,000 residents in portions of Sonoma and Marin counties (customers receive their drinking water and water bill from their local city or water district). Sonoma Water maintains over 100 miles of water aqueducts and pipelines, as well as numerous pump stations, storage tanks, production wells, and other critical equipment as part of its Water Transmission System.

# Water Transmission System Budget FY 2023-2024 Draft, March 6, 2023

\$68.30

This budget overview is for Water Transmission System services only. Sonoma Water also provides sanitation, flood protection, and other services. For detailed budget information, please visit **www.SonomaWater.org/finance**.

longterm capital projects.

drought outreach tools and programs.

#### **Mission**

To provide reliable water supply, wastewater management, and flood protection essential services for a thriving community and a healthy environment.

#### **Vision**

Ensuring resilient water resources now and for future generations.

#### Strategic Plan 2023-2028

The final 2023 Strategic Plan is a five-year roadmap for the future and includes six goals focused on planning and infrastructure, emergency preparedness, climate resiliency, organizational excellence, environmental stewardship, and community engagement. ### Status of the Water Transmission System Infrastructure

After decades of service, Sonoma Water's critical infrastructure — from aqueducts and pipelines to pump stations, storage tanks, and

wells — is aging. Much of it is nearing the end of its useful life. The infrastructure's age, along with significant levels of deferred maintenance, intensifies the need for investments to ensure we can continue to provide a reliable, sustainable water source into the future. This

budget is an important, necessary step in that direction.

Fortunately, we've been successful in acquiring grants from a variety of sources, and are also using fund balances and bond

> proceeds to help to moderate rate increases. In fact, Sonoma Water's wholesale rates (what we charge water contractors) are among the lowest in the greater bay area. Future proposed budgets will continue to address the longer-term need for ongoing infrastructure maintenance, replacement, and improvement,

all with the goal of providing the source water for the benefit of the communities served.

## How does this budget affect the rates to city and district water contractors?

Much of Sonoma

Water's infrastructure

is nearing the end

of its useful life

and needs repair

or replacement.

The FY 2023-2024 budget anticipates an approximately 9.5% - 12.5% increase in the fees we charge to water contractors, who then deliver that water to their customers.

Sonoma Water was able to keep increases within this range by offsetting \$18.15 million in costs with the use of grant funds, fund balance, and bond proceeds.

Sonoma Water's city and special district water contractors:
