E. Summary of Issues and Significant Changes

The Sonoma Valley County Sanitation District (District) provides sewage collection, treatment, and disposal service to the Sonoma Valley area. Wastewater is collected primarily by a gravity system and flows to the District's wastewater treatment plant for processing. Recycled water is used to irrigate local crops during the summer and is discharged to San Pablo Bay via Schell Slough during the winter. The District's treatment plant is permitted to treat an average daily dry weather flow of up to 3.0 million gallons per day to tertiary standards. Waste Discharge Requirements, Order No. R2-2008-0090 (NPDES Permit No. CA0037800), was issued on October 8, 2008 by the California Regional Water Quality Control Board, San Francisco Bay Region (SFBRWQCB) for Sonoma Valley CSD's treatment plant.

Most of Sonoma Valley CSD's collection system is several decades old and is in need of replacement. In 2015, the District received a Cease and Desist Order from the Regional Board that establishes a timeline for completing several collection improvement projects needed to reduce wet weather overflows. Compliance with this order will require significant investments in the collection system. The District will continue to increase rates over and above the rate of inflation to generate funds for replacing the collection system.
