

TAC Emergency Training & Coordination Committee (ECC)

2026 Workplan

PURPOSE OF THE ECC

To strengthen emergency interoperability, response, and recovery between Sonoma Water and the Water Contractors through improved coordination and communication.

- Create a forum for coordination and collaboration.
- Strengthen partnerships through joint training and exercises.
- Develop and practice mutual aid systems.
- Improve regional readiness and teamwork.
- Use projects as training opportunities.

2026 GOALS

GOAL 1: Develop Sonoma Water/Water Contractors <i>emergency response concept of operations plan</i> outlining interagency communications and coordination during emergency events.	
January to June 2026	Develop response coordination structure and emergency roles and responsibilities. Outline emergency concept of operations ensuring alignment with emergency management systems.
July to September 2026	Develop tools and templates for action planning, information sharing, shared material material/equipment inventory including resource typing, and vendor/contractor lists.
October to December 2026	Conduct validation exercise and provide train-the-trainer training for key staff across all agencies.

GOAL 2: Provide structured, facility-specific <i>system overviews and guided operational tours</i> of Sonoma Water and Water Contractor facilities to ensure participants gain a clear, working understanding of system interdependencies, infrastructure functions, and day-to-day operational practices.
