- 7 Rate Protest Form

Understanding Inflow and Infiltration

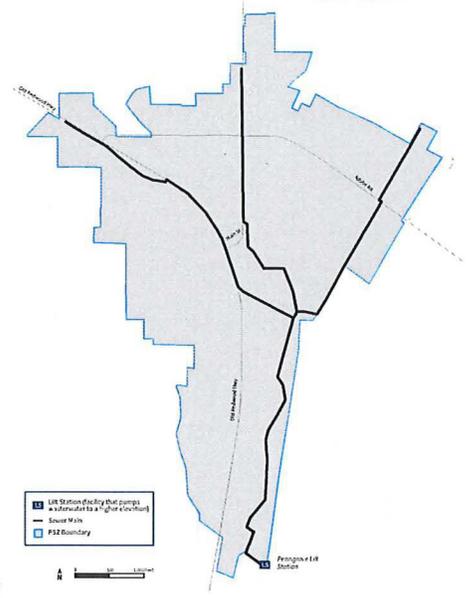

The Penngrove Sanitation Zone (PSZ) serves the unincorporated community of Penngrove in southern Sonoma County. The zone includes roughly 556 sewer connections and conveys wastewater to the City of Petaluma for treatment and disposal under a long-standing service agreement. Much of the collection system was originally built in the 1970s, with additional extensions completed as the community grew.

A key challenge for the system is inflow and infiltration of non-sewer discharges. Inflow is stormwater that enters the sewer system through direct connections such as downspouts or uncapped cleanouts. Infiltration is groundwater that seeps into pipes and manholes through cracks, aging joints or deteriorated infrastructure. Both processes occur during storms and periods of high groundwater, when the system is most vulnerable. This inflow and infiltration of stormwater uses capacity in the collection system and increases operation and treatment costs. Wastewater systems are designed to carry and treat sewage, not stormwater.

When stormwater enters the system, flows can rise far above normal dry weather levels. Higher flows require additional pumping, increase energy use and can create conditions that strain downstream facilities. Because PSZ wastewater is treated at the City of Petaluma’s Ellis Recycling Facility, on a flow-based cost structure, excess wet-weather flows translate directly into higher treatment charges for Penngrove Sanitation Zone ratepayers.

Managing inflow and infiltration is an important part of maintaining the reliability of the system and controlling long-term costs. Sonoma Water routinely conducts sewer condition assessments and targeted repairs to reduce inflow and infiltration, including manhole inspections, closed-circuit television pipe inspections and flow monitoring. This work identifies areas where stormwater is entering the system and helps plan rehabilitation projects that extend the service life of the collection system.

As part of its ongoing maintenance program, Sonoma Water is conducting a new round of field studies to evaluate system performance and update long-term planning needs. Crews will be working within public sewer easements to inspect manholes, install temporary flow meters and assess pipe conditions. More information about the Penngrove Sanitation Zone and current projects is available at SonomaWater.org/psz.

Sanitation Rate Relief Program

Save money on your annual sewer service bill

The Sanitation Rate Relief Program provides a discount on sewer service bills for low-income property owners within the districts and zones managed by Sonoma Water.

The discounts can reduce the annual sewage charge on your property tax bill by up to 50%. Nonprofit organizations that provide housing for low-income renters within the district or zone are eligible to participate in the program.

Sonoma Water will begin accepting applications from April 16 to July 10.

Customers must apply every year for the Sanitation Rate Relief Program.

Participants in the PG&E CARE Program must submit a copy of their most recent PG&E bill as proof of participation in the CARE Program. Eligible customers should sign up for the PG&E CARE Program as soon as possible to facilitate qualification for the Sanitation Rate Relief Program.

Learn more and apply at SonomaWater.org/SRRP.

Water Rebates in Your Zone

Water-Saving rebate programs available

As a sanitation customer, you have some water-saving tools at your fingertips! Please take advantage of the following water-saving programs offered on a first-come, first-served basis while funding is available.

Front Load High-Efficiency Clothes Washer Rebate: Receive up to \$125 back on the purchase and installation of a new, qualifying high-efficiency clothes washer. Rebates are available for all CEE Tier 2 & Advanced Tier listed clothes washers except those containing silver ion technology.

High-Efficiency Toilet Rebate: Get up to \$150 back on the purchase and installation of each new, qualifying high-efficiency toilet from the List of Qualifying Models.

Download rebate application forms and learn more at SonomaWater.org/Sanitation-Rebates or call (707) 547-1918.

**Grease in
the Bin,**

we all WIN!

**Don't clog
the sink!**

Baywise.org

Fats, Oils, and Grease (F.O.G.s) Cause Clogs

Prevent clogs and protect your plumbing!

Wipe before washing: For plates and pans with residual grease or oil, use a paper towel to wipe them clean before washing. Place the greasy paper towels, napkins, and food scraps in the compost bin.

Dispose of larger amounts responsibly: If you have more than a little oil (but less than 2 cups), let it cool, then carefully discard it in your garbage.

For More information, please visit:
SonomaWater.org/PollutionPrevention.

Maintaining and Repairing Aging Infrastructure

Since 1995, Sonoma Water has been dedicated to managing eight vital wastewater districts and zones across Sonoma County. Many of the systems have served the community for decades, ranging from 43 years in areas like Russian River to over 70 years in Sonoma Valley and Occidental.

The challenge of aging systems as our collection and treatment infrastructure ages, the need for continuous maintenance and periodic replacement becomes more critical. At the same time, we must navigate increasingly strict water quality regulations, which continue to drive up both operational and capital compliance costs. Because many of the districts are small, these rising expenses are shared among a limited number of ratepayers, intensifying the financial impact on each customer.

Balancing needs and affordability while proposed rate increases for the districts are higher than in the recent past, these adjustments are essential. They allow us to:

- Maintain and replace critical aging infrastructure.
- Address deferred maintenance to prevent more costly repairs in the future.
- Protect public health and the environment through responsible system management.

Sonoma Water is sensitive to the financial strain these increases may cause. To help offset capital project costs and reduce the burden on ratepayers, we are actively pursuing grants and loans.

In the sections below, you will find specific details regarding the proposed rate increase for your district or zone. We have also included a clear breakdown of how funds are collected and allocated, along with a list of planned infrastructure projects for the upcoming year.

| | FY25-26 | FY26-27 Proposed |
|----------------------|----------|------------------|
| ESDs | 556 | 565 |
| Annual Rate per ESD | \$2,298 | \$2,476 |
| Annual Increase | \$166 | \$178 |
| Monthly Rate per ESD | \$191.50 | \$206.33 |
| Monthly Increase | \$13.83 | \$14.83 |
| Rate Increase | 7.8% | 7.8% |
| Increased Revenue | \$92,296 | \$100,570 |

*Fixed Rate sewer bills are calculated based on usage of an Equivalent Standard Dwelling (“ESD”). An ESD is defined as what an average single family home would use in a given year.

Budget Approval

The draft proposed budgets for all sanitation districts and zones are available for review now at Sonoma Water’s office located at 404 Aviation Boulevard, Santa Rosa, California 95403, and on Sonoma Water’s website at [SonomaWater.org/Current-Budget](https://www.SonomaWater.org/Current-Budget).

In addition, owners of the properties in districts and zones receive notice of the proposed rates in this newsletter. The public can protest rate increases up to the date of the rate hearings, which this year are scheduled for May 12, 2026 at the Board of Supervisors chambers. (A protest form and rate hearing information are available on pages 5-7 of this notice).

About Your Zone

In 1995, Sonoma Water assumed responsibility from the County of Sonoma for managing the county sanitation districts and zones, including your zone. The zone serves 556 Equivalent Single-Family Dwellings within a 475-acre service area. The wastewater collected from the zone is routed through its lift station to the City of Petaluma's Ellis Creek Water Recycling Facility where it is treated to meet tertiary standards. High-quality tertiary treated recycled water is an important source of water and its use offsets potable water demands.

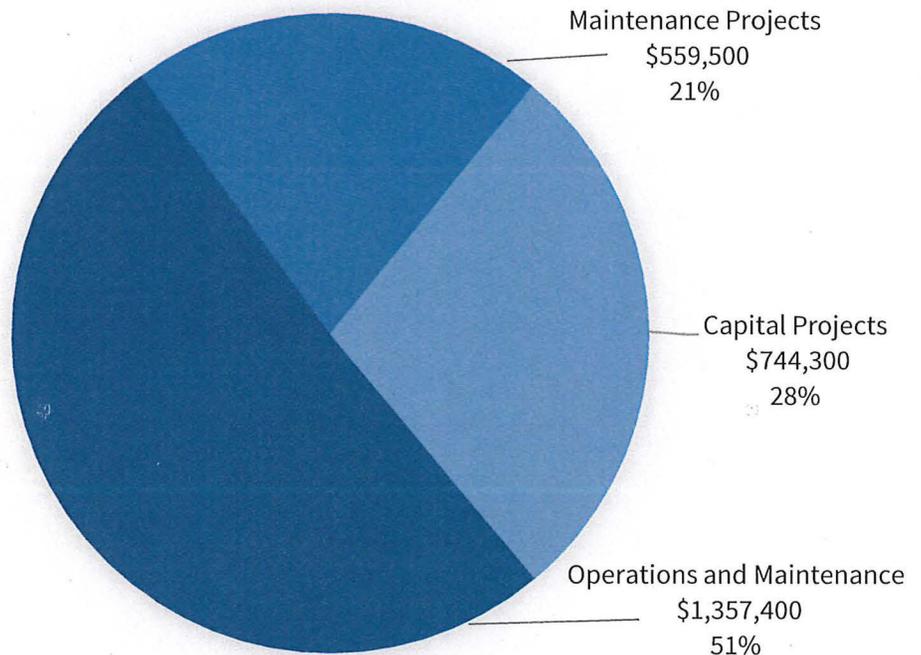

FY26-27 Budgeted Expenditures - \$2,661,200

Maintenance Projects – \$559,500

- Collection System Rehabilitation and Repairs
- Inflow and Infiltration Reduction Improvements
- Manhole Rehabilitation and Monitoring
- Manhole/Sewer Easement Survey
- Rate Study
- Mechanical Maintenance & Electrical/Instrumentation Equipment
- Pavement Preservation - Sonoma Public Infrastructure
- Sewer Collection Inflow and Infiltration Study & Development Analysis
- Sewer Inspection Data Management & Analysis Services
- Wet Weather Hauling Services

Capital Projects – \$744,300

- Replace/Upsize Force Main Phase 1 Design & Right of Way

PROPOSITION 218

Sonoma County Water Agency

Penngrove Sanitation Zone

Notice of Public Hearing Regarding Proposed Sewer Service Rate Increase

Date, Time, and Place of Public Hearing

On May 12, 2026 at 10:05 a.m. or as soon thereafter as the matter may be heard, the Board of Directors (Board) of the Sonoma County Water Agency (Agency) will conduct a public hearing to consider increasing the annual sewer service charge (Sewer Charge) to be collected on account of sewage collection and treatment services provided by the sewer system of the Penngrove Sanitation Zone (Zone) to property within the Zone. If approved, the increased Sewer Charge and rate structure modifications will become effective on July 1, 2026.

The public hearing will be held in the Board Meeting Room, 575 Administration Drive, Room 102A, Santa Rosa, California. The Board is currently not having virtual meetings with virtual participation from the public. If a virtual meeting is required by unforeseen emergency circumstances, or if virtual participation will be implemented, information regarding virtual participation will be available on the Board's agenda 72 hours prior to the meeting at <https://sonoma-county.legistar.com/Calendar.aspx>.

The Sewer Charge will be imposed on each parcel with one or more structures that are connected to the system. The Sewer Charge will be collected on the general property tax bill administered by Sonoma County. Payment of the Sewer Charge will be the responsibility of the owner of the parcel.

Reasons for the Sewer Charge and Use of the Funds Collected

The Sewer Charge is imposed to pay for the cost of providing safe and reliable sewer service to your property in conformance with legal requirements, and is necessary: (a) to finance the ongoing operation and maintenance costs of the system; (b) to pay the capital replacement program costs of the system, which provides for the long-term replacement of system facilities as they wear out; and (c) to maintain sufficient reserves.

Sewer Rate Increase

Effective July 1, 2026, the Zone proposes to increase the Sewer Charge to \$2,476 per year per "equivalent single-family dwelling" (ESD), an annual increase of \$178 or \$14.83 per month. A standard single-family home constitutes one ESD. Parcels which have other uses (for example, apartments and commercial buildings) will be assigned a number of ESDs using standard equivalency factors that estimate the probable quantity and quality of sewage effluent normally generated by such uses in comparison to a single-family home. Additional information on this standard methodology is available from the Zone.

The increased Sewer Charge has been calculated by dividing the annual costs of providing wastewater treatment and collection service by the estimated number of ESDs, which results in a Sewer Charge of \$2,476 per ESD.

Each customer with a sewer connection will be charged an annual Sewer Charge calculated as follows:

$$\text{\$2,476 per ESD} \times \text{Number of ESDs}$$

The number of ESDs for your parcel is included in this newsletter in the box to the left of your mailing address.

The draft proposed budget for fiscal year 2026-27 describes the total annual expenses in detail and is available for review at the Penngrove Sanitation Zone, c/o the Sonoma County Water Agency, 404 Aviation Boulevard, Santa Rosa, California 95403, and on Sonoma Water's website at <https://www.sonomawater.org/current-budget>. Also available at this location is the 2026 Written Basis of Sewer Service Charge.

Further Information Available Prior to the Hearing

At the hearing, the Board will consider adoption of an ordinance that will establish the increased Sewer Charge. A copy of the ordinance will be on file and available for review at the Sonoma County Water Agency, 404 Aviation Boulevard, Santa Rosa, CA 95403. In addition, please contact Sonoma Water at (707) 521-6215 for further information and/or to obtain copies of the draft proposed budget for fiscal year 2026-27, and the written basis for the sewer rates.

Protest Procedure

This notice has been mailed to you because records of the Sonoma County Assessor list you as an owner of one or more parcels within the Zone that will be subject to the Sewer Charge while connected to the system. In the event you have sold property you may have owned within the Zone, please send this notice to the new owner. This document can be found in the spring newsletter online at: <https://www.sonomawater.org/psz>.

Prior to the public hearing, property owners, or tenants who are directly liable for the payment of the Sewer Charges, may submit written protests respecting the Sewer Charge. At the public hearing, the Board will consider all written protests that have been received by the prescribed deadline. In order to be considered, a written protest must be made on the attached form. Only one protest will be counted per parcel. Only protests signed by the current owner(s), or tenant(s) directly liable for paying the Sewer Charge, will be allowed and the protest must be received no later than the following deadlines:

- If submitted by mail, the protest must be received (NOT postmarked) no later than 5:00 p.m. on Monday, May 11, 2026 at the mailing address on the form.
- If hand delivered, the protest must be delivered no later than 5:00 p.m. on Monday, May 11, 2026 at the mailing address on the form.

Sonoma Water
404 Aviation Blvd.
Santa Rosa, CA 95403

Procedure for Legal Objections

In addition to a protest, you may submit a substantive objection stating grounds why the fee is not in compliance with applicable law. All such objections must be received at the address above by April 21, 2026. A failure to object in writing by this deadline bars any right to challenge the fee in a legal proceeding.

There is a 120-day statute of limitations for challenging any new, increased, or extended fee or charge.

Date of this Notice: March 6, 2026

RATE PROTEST FORM

NOTE: IN ORDER TO BE CONSIDERED, ANY PROTEST OR OBJECTION MUST USE THIS FORM

WRITTEN PROTEST

I am the parcel owner of the property located at the address on the back of this form, or a tenant that is directly liable for paying the Sewer Charge for the property. I am submitting this form to protest the proposed Sewer Charge increase.

If, in addition to your protest, you have a substantive objection, attach it to this form and use the heading Objection.
